・学習方針（講義概要等）

This course is a comprehensive introduction to English for medical purposes. It will include an intensive focus on the word roots, prefixes, and suffixes used in common medical terms, as well as a focus on short case reports and conversations based on common medical complaints. Students who successfully complete the course will obtain the knowledge required for basic written and spoken communication in the medical field. Half the course will be conducted in English so as to maximize exposure to the target language. However, lessons will be student centred, with students spending most class time working alone, in pairs, or in groups on various learning tasks. In addition to two exams, tests will be given during class time as detailed in the lesson schedule. Punctual attendance, active participation, and completion of homework assignments are essential in order to achieve a high grade.

・教育成果（アウトカム）

Through engagement in classroom learning tasks, and completion of self-study activities, students will become able to understand and use appropriate vocabulary, phrases and strategies in basic medical communication contexts.

・特記事項・その他

1. Students will be divided into class C1 and C2 based on final scores in 1st-year English classes (ESL and ERW).
2. All students must purchase both assigned textbooks.
3. The order in which the course material is covered will differ between class C1 and class C2, but the material covered will be the same.
4. Tests given in class will be returned the following week together with the correct answers, and full explanations will be given.
5. WebClass and other internet-based resources (LINE OpenChat, Quizlet, etc.) will be used extensively, so students are encouraged to bring a WiFi-ready device (tablet, PC, or smartphone) to each lesson.

Students should review and prepare for upcoming lessons following the instructions in this syllabus, as well as any additional guidelines provided in class. More than 100 minutes should be allocated for lesson review and preparation. This requirement is applicable to all lessons. Feedback on exams and assignments completed in class will be provided in the following lesson or on WebClass. Where necessary, lessons may go beyond the directives in the Model Core Curriculum for Medical Education in Japan and present the most up-to-date medical research findings. Lecture materials are accessible through WebClass.

In this course, students are required to complete 160 minutes of independent study in addition to pre- and post-class learning.
