

氏名	所属	職名	取得学位	専門分野	主な論文・著作・業績
石河 太知	微生物学講座 分子微生物学分野	教授	博士（歯学）	病態系口腔科学関連 細菌学関連 免疫学関連	①Wang T, Chiba T, Ishikawa T, Kuroda H, Kakisaka K: Cell-type-specific actions of carnosic acid against Porphyromonas gingivalis-induced proliferation in liver cancer cells. Journal of oral microbiology 18(1) 2684127. (2026) ②Sawase M, Shirakura K, Ohara-Nemoto Y, Nishimata H, Kondo H, Ishikawa T, Fujita Y, Nemoto TK: Importance of N-terminal P2 residue in substrate recognition by bacterial DPP7 activity revealed by coefficient of variation in protease activity. Biochimica et biophysica acta. General subjects, 1870(8) 130959. (2026) ③Sjöqvist S, Ishikawa T, Shimura D, Kasai Y, Imafuku A, Bou-Ghannam S, Iwata T, Kanai N: Exosomes derived from clinical-grade oral mucosal epithelial cell sheets promote wound healing. Journal of extracellular vesicles, 8(1), 1565264. (2019) ④Ishikawa T, Wondimu Z, Oikawa Y, Ingerpuu S, Virtanen I, Patarroyo M: Monoclonal antibodies to human laminin α 4 chain globular domain inhibit tumor cell adhesion and migration on laminin 411 and 421, and binding of α 6 β 1 integrin and MCAM to α 4-laminins. Matrix Biology, 36: 5-14 (2014) ⑤文部科学省科学研究費補助金 基盤研究(C)「課題名：歯周病菌の全身性疾患共役因子であるジペプチジルペプチダーゼの解析と阻害剤の開発」（2026-04-01 – 2029-03-31）研究代表者
三浦 利貴	微生物学講座 分子微生物学分野	助教	博士（薬学）	病態系口腔科学関連 医療薬学関連 遺伝学関連	①Suzuki S, Miura T, Shimoyama Y, Ohara-Nemoto Y, Nemoto K T, Yamada H, Ishikawa T: Dipeptidyl peptidase from Streptococcus anginosus with substrate specificity for Xaa-Pro/Ala and potential impact on tumor immunity. Journal of Oral Biosciences. 68(1), 100723. (2026) ②Oikawa T, Miura T, Wang T, Yaegashi T, Ishikawa T, Sasaki D: Propionic and acetic acids potentially compromise junctional epithelial barrier function and contribute to periodontitis progression. Journal of Oral Biosciences. 68(1), 100716. (2026) ③Terashima J, Onodera R, Miura T, Habano W, Ozawa S: POTENTIAL RISKS PRESENT IN SELECTING CONTROL GENE FOR QUANTITATIVE RT-PCR: EXAMPLE OF MEASUREMENT USING 2D CELLS AND 3D SPHEROID OF ESOPHAGEAL CANCER CELLS. TISSUE CULTURE RESEARCH COMMUNICATIONS, 41(1):1-9. (2023) ④Miura T, Onodera R, Terashima J, Ozawa S, Habano W: β -naphthoflavone-induced upregulation of CYP1B1 expression is mediated by the preferential binding of aryl hydrocarbon receptor to unmethylated xenobiotic responsive elements. aExperimental and Therapeutic Medicine, 22(6):1410. (2021) ⑤文部科学省科学研究費補助金 若手研究「課題名：高血圧治療薬の効果減弱に及ぼす歯周病原細菌の影響」（2026-04-01 – 2029-03-31）研究代表者

山田　ありさ	微生物学講座 分子微生物学分野	助教	博士（歯学）	病態系口腔科学関連 医療薬学関連 細菌学関連	①Tamura H, Yamada A, Kato H: Identification of A2059G 23S rRNA and G439A rplC gene mutations in Streptococcus criceti strain OMZ 61, a strain resistant to azithromycin, josamycin and clindamycin/ Genes Genet. Syst. 90: 259-267(2015) ②Tamura H, Yamada A, Kato H: Molecular characterization of the dextran-binding lectin B gene dbIB of Streptococcus criceti in Streptococcus mutans strain GS-5 with mutations in both gbpC and spaP genes/ Genes Genet. Syst. 89: 41-50(2014) ③Tamura H, Yamada A, Kato H: Caracterization of Streptococcus criceti inserton sequence ISScr1/ Genes Genet. Syst. 87: 153-160(2012) ④Tamura H, Yamada A, Kato H: Identification and characterization of an autolysin gene, atlA, from Streptococcus criceti/ J. Microbiol. 50(5): 777-784(2012) ⑤Yamada A, Tamura H, Kato H: Identification and characterization of an autolysin gene, atlg, from Streptococcus sobrinus. FEMS Microbiol Lett. 291(1): 17-23(2009)
