・学修方針（講義概要等）

English is the primary language of international medical communication, and doctors need good English speaking and listening skills in order to function effectively in any environment where they encounter English-speaking patients and English-speaking healthcare professionals, whether inside or outside Japan. English Speaking and Listening I (ESL I) is an introductory course focused on developing these communication skills through active engagement with Internet-based materials relating to a wide range of topics in health and medicine. There will be a heavy focus on active learning through discussions, oral presentations, and engagement with interactive online resources, so active participation in class is a must. Classes will be conducted entirely in English so as to maximize exposure to the target language.

・教育成果（アウトカム）

Through video-based viewing and listening tasks, pair and group discussion tasks, engagement with interactive online resources, and the preparation and delivery of short English speeches, students will become capable of basic communication with English speakers in professional contexts, both abroad and in Japan.

（ディプロマポリシー：1、2、3、4、5、6、7、8）

・到達目標（SBO）

At the end of the course students will be able to:

1. apply basic strategies for effective listening and speaking.
2. use a range of vocabulary related to health and medical topics.
3. express basic opinions on a range of health and medical topics.
4. deliver short presentations to an audience without reading from a script.
5. work collaboratively to achieve outcomes in pairs and groups.
6. collect and synthesize material from online sources.
